IT Lead & Solution Architect | Technical Authority | USAF Veteran | MBA

Summary

Technical Lead and Solution Architect with experience leading cross-functional engineering teams, complex system implementations, and secure enterprise IT infrastructure. Former USAF Intelligence Technical Team Lead combining a B.S. in Computer Networking, MBA, and strong background in enterprise security, system architecture, and technical risk management. Proven track record serving as a decision authority between executive stakeholders, security leads, and development teams to deliver scalable, NIST-compliant systems on schedule and within budget.

Skills

- System Architecture
- Requirements Traceability
- Technical Authority & Leadership
- Cloud & Network Infrastructure
- DevOps & Containerization
- Technical Risk Mitigation
- Stakeholder & Vendor Management
- Intelligence Operations

Work Experience

Westat, Remote, Rockville, MD

May 2022 to Present

IT Lead & Solution Architect (formerly Sr. IT Project Manager)

- Served as Technical Authority across up to 5 concurrent projects and set architecture & API standards.
- Managed requirements traceability, mapping system security controls to design specs & GitLab tickets.
- Acted as primary technical escalation point, mitigating key architectural risks to prevent downtime.
- Drove system security compliance, aligning technical solution designs & SDLC with NIST standards.
- Directed technical performance measures, analyzing system metrics to maintain a 99.9%+ uptime.
- Guided cross-functional engineering teams, enforcing architecture standards across the full SDLC.
- Negotiated 3rd-party vendor costs and scope to integrate Okta SSO across multi-site web platforms.

United States Air Force, Various Locations

June 2017 to June 2023

Assigned to the **203rd Intelligence Squadron**

Technical Team Lead

- Translated mission objectives and stakeholder requirements into targeted technical execution strategies.
- Gathered and analyzed complex technical data to deliver actionable insights for operational planning.
- Delivered real-time, data-driven situational analysis to inform leadership decisions and mission priorities.
- Partnered with cross-agency teams to refine strategic objectives and elevate reporting effectiveness.

Boston IT Services, Boston, MA

April 2017 to May 2018

IT Engineer

- Delivered infrastructure planning and technical resolutions for small-to-mid-sized business clients.
- Led client implementation and technical support for SaaS-based tools, products and platforms.

Independent Consultant, Various Locations

August 2016 to April 2017

IT Consultant

- Created and executed plans for migration from a self-hosted to cloud-based email solutions.
- Administered and monitored Windows Server and Linux (Ubuntu/CentOS) based systems.

Athenahealth, Watertown, MA

May 2015 to July 2016

IT Advisor

- Served as the primary technical liaison for C-level stakeholders to drive successful product adoption.
- Consulted on device infrastructure requirements to ensure compatibility with mission-critical SaaS systems.
